

Global Risk Engineering Services

CHUBB®

Help protect your business with Chubb's global, in-house Risk Engineering Services. We'll work with you to customize a professional safety and health program that helps you anticipate and minimize costly exposures.

Our global network of experienced risk engineers with deep industry and technical knowledge can share best practices to help you mitigate or avoid a costly loss. Our Risk Engineering Services approach is custom crafted to address your specific risks, from repetitive injuries to emerging hazards to catastrophic failures. For more than 70 years, we've provided risk consulting and loss mitigation services to help our clients around the world:

- Identify exposures through testing and techniques such as sprinkler system analysis, infrared thermography, jurisdictional boiler inspections, and our PinPoint risk assessment tool.
- Minimize the likelihood of losses through risk management and loss prevention programs based on our industry knowledge and tailored to your unique needs.
- Minimize potential for downtime by identifying obstacles to quick disaster

recovery, such as hard-to-replace machine parts or dependence on single suppliers.

Tailored Industry Solutions

From mixed occupancy real estate to medical device manufacturers, Chubb Risk Engineering Services helps businesses stay ahead of the risks. Our Risk Engineering professionals have cultivated deep knowledge in industries such as:

- Advanced Manufacturing
